

Announcing the next series

NO-DIG ROAD SHOW 2009/10

The Objective: The NO-DIG Road Show is a series of one day events, comprising an integrated exhibition and seminar programme. The series provides suppliers with an opportunity to participate at these high quality forums on trenchless technology and to meet a new audience at four different locations.

The Format: Industry personnel are invited to join the seminar programme and hear a selection of presentations designed to give a broad brush view of the latest techniques available, along with case study papers. The seminar programmes are compiled by the UKSTT.

The Exhibition: The trade show stands are an integral part of the day, providing delegates with an opportunity to meet key suppliers to the industry. The seminar programmes are carefully structured to allow delegates ample time to visit the stands. All catering arrangements will be situated within or adjacent to the exhibition area.

The Audience: The venues have been selected to attract delegates from key areas where trenchless techniques are planned as an integral part of the future programmes of renewal and refurbishment of utilities and underground services.

THE PROGRAMME
