UTILITYWEEK

Aim: To provide delegates with a broader understanding of street works and to share information and ideas to help the utilities industry and other stakeholders to improve performance in all aspects of street works.

For: Representatives from all organisations with an interest in the above i.e. gas, electricity, water and telecoms companies, along with contractors, Highways and Local Authorities, Government, trade bodies and other stakeholders.

Format: A wide range of high quality, stimulating presentations from influential speakers, together with extensive networking opportunities, along with a topical exhibition.

Date: Thursday 31 January 2008

Venue: Royal College of Physicians, Regent's Park, London

Cost: SBGI & ENA members **£200 + VAT**
Non members **£245 + VAT**

To book: Please complete the form on the back of this leaflet

Queries: Contact Vanessa Webster, on **01926 463948** or email **vanessa@sbgi.org.uk**

The Utility Networks Division of **SBGI** represents the onshore gas industry supply chain in all sectors of network operations from 'beach-to-meter'. In addition the organisation is seeking to stretch its representation into areas 'beyond gas', led by its members' wider business interests in related sectors. Members includes gas distribution network operators, network engineering contractors and equipment providers, metering and metering services companies, and gas storage operators. **SBGI's** Mission is to represent and promote the interests of the UK energy and utility networks industry, building on its proud track record of over 100 years service to the onshore gas industry, and provide a range of value-adding services to members.

www.sbgi.org.uk

ENA's **purpose** is to consolidate a highly-focused trade association that delivers value to its members by achieving excellence, both within its internal services and externally in its relationships with all stakeholders, for mutual benefit.

ENA's **vision:** To exert influence successfully on common issues in the operating environment, including regulation and the wider policy framework, both at a domestic and European level, to provide cost-efficient 'in common' technical services and related businesses for the benefit of members.

ENA's **mission:** To promote and enable the UK to have the safest, most reliable, efficient and sustainable energy networks in the world.
