NO-DIG ROAD SHOW 2008

The NO-DIG Road Show is a series of one day events, presenting a convenient forum for gathering information on trenchless technology - the latest techniques, the variety of applications and consequential benefits to contractors, clients and the public at large.

Seminars

Compiled by the United Kingdom Society for Trenchless Technology (UKSTT), the seminar programmes feature case study presentations highlighting the challenges and solutions of some major engineering projects of regional relevance where no-dig technology has been applied. Papers presented will also focus on various techniques, selection methods and environmental considerations.

Exhibition

The trade show stands are an integral part of the day, providing visitors and seminar delegates with an opportunity to meet key suppliers to the industry. The seminar programme is carefully structured to allow delegates ample time to visit the stands and all catering arrangements will be situated within or adjacent to the exhibition area. Entrance to the exhibition is free of charge.
