

In conjunction with

Present an evening of
TRENCHLESS TECHNOLOGY

Two presentations will be given: -

Trenchless Technology and Waste Management – How Trenchless Technology techniques avoid waste and thus maximise material resource efficiency including reducing the carbon footprint.
Presented by Peter Crouch, Technical Secretary UKSTT.

Swagelining – The last 20 years, an illustrated presentation showing how Swagelining has developed from the early British Gas development days to a current 60km long 24” water injection pipeline project in the Congo.
Presented by Steve Kent, MD Pipe Equipment Specialists Ltd.
